Experience

Software Engineer (React Native + React + Next.js)

Jan 2025 – Present

Jamtech Technologies Pvt Ltd

Lucknow, UP

- **Delivered end-to-end full-stack solutions** by developing **80+ RESTful APIs** in **Next.js** and building responsive, **component-driven React UIs**, enhancing user engagement for **100,00+ active users**
- **Engineered scalable microservices** for backend operations and optimized **Next.js frontends**, improving **page load times by 25%** and boosting cross-platform performance.
- **Refactored legacy monolithic systems into modular full-stack microservices**, achieving **45% scalability gains** and faster feature delivery cycles
- **Collaborated with cross-functional teams** in an Agile environment to design, develop, and deploy **end-to-end features**, reducing feature delivery time by **20%**
- **Enhanced frontend performance** by optimizing React components, lazy loading, and API integration, resulting in **30% faster client-side rendering**
- **Mentored and onboarded 5+ junior developers**, introducing **code review best practices and structured coding standards**, improving **team productivity by 20%** and reducing review cycle times by **25%**

EDUCATION

SRMS Engineering College, Bareilly, UP

7 CGPA

Bachelor of Technology in Computer Science and Engineering

DEC.2020 – July 2024

Projects

Akati App/Website – Scalable Application/Website / React Native , SQL, Node.js, API

- Akati is a **digital reading platform** that allows users to **discover, browse, and read books and stories anytime, anywhere** through a **mobile app**.
- It is designed to make reading simple, intuitive, and accessible on all mobile devices, focusing on bringing diverse literary content to users worldwide..
- **Designed config-driven modules** minimizing future code changes and enabling dynamic feature rollouts.

Achievements

- **Top 20% with 350+ problems solved** on **Leetcode** demonstrating strong problem-solving skills in algorithms and data structures .
- **Global Rank 115** in CodeChef Cook-off Programming Contest.

Technical Skills

Languages: Java (8-21), SQL, JavaScript, **Typescript**, HTML/CSS, ES6

Technical Skills: (React Native(Android)), Node.js RESTful APIs, **React**, **Next.js**, Bootstrap, **PostgreSQL**, **Component-driven design**, **State management**, **Responsive UI**, **REST API integration**, **Lazy loading**, **Microservices architecture**, **Event-driven design**

Developer Tools: **Maven**, **Gradle**, **Git**, **Postman**, **Jenkins**, **JIRA**, **Docker**, **Kong(API Gateway)**, **CI/CD Pipelines**, **JUNIT Testing**, **Dynatrace**, **Redis**, **Swagger**, **Apache Tomcat**, **Kubernetes**, **AWS**, **Eureka**

Core Skills: Data Structures and Algorithms, Distributed and Scalable Systems, **Object-Oriented Design**, **Styled Components**, **Tailwind**, **SDLC**, **SOLID**, **Full-Stack Development**, **Agile**
